SHORTENED STATUTORY PERIOD OF RESPONSE	MAIL DATE	DELIVERY MODE
3 MONTHS	02/23/2007	PAPER

**Please find below and/or attached an Office communication concerning this application or proceeding.**

If NO period for reply is specified above, the maximum statutory period will apply and will expire 6 MONTHS from the mailing date of this communication.

<b>Office Action Summary</b>	<b>Application No.</b> 10/525,864	<b>Applicant(s)</b> HANLON, MARK	
	<b>Examiner</b> Evan H. Langdon	<b>Art Unit</b> 3654	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

#### Disposition of Claims

- 4) ☒ Claim(s) 1-21 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-21 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_ are subject to restriction and/or election requirement.

#### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

#### Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_.
  3. ☒ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 2, 4, 6, 9-13, 17 and 21 are rejected under 35 U.S.C. 102(e) as being anticipated by Enchos (US 2002/0185637 A1).

In regards to claims 1 and 17, Enchos discloses a ceiling mounted lift, comprising:

a support frame 1028 housing a double fabric panel drive assembly 824 (Fig. 31) that operates to raise and lower a lifting platen 1034; and

a stabilizer 826 having a first arm and a second arm (Fig. 32 and 36, see below), such stabilizer disposed between the support frame 1028 and the lifting platen 1034.

FIG. 32

In regards to claims 2, Enchos discloses the stabilizer comprises a bearing at a pivot (see above, Fig. 39) joining the first and second arms.

In regards to claim 4, Enchos discloses all movement of the stabilizer is substantially planar.

In regards to claim 6, Enchos discloses the drive mechanism comprises a double fabric drive roller 1014.

Art Unit: 3654

In regards to claims 9 and 10, Enchos discloses a home theater component comprising a projector 12.

In regards to claims 11 and 12, Enchos discloses a device 12 lowered for maintenance wherein the device lowered for maintenance at least one of a light fixture 12 (light in side of projector, see paragraph 156).

In regards to claims 13, Enchos discloses a ceiling mounted lift, comprising:

a support frame housing 1028 a double fabric panel drive assembly 824 that operates to raise and lower a lifting platen 1034 using a fabric drive roller 1014; and

the support frame housing sized and dimensioned to stow substantially above a ceiling surface 36 (Fig. 1).

In regards to claim 21, Enchos discloses a ceiling mounted lift having a double fabric panel drive assembly 824, such lift comprising a stabilizer 826 having a spring loaded pivot such that a first and second arms of the stabilizer are biased toward each other (paragraph 155).

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 14-16 and 18-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Enchos (US 2002/0185637 A1).

In regards to claims 14, 15 and 20, Enchos discloses the ceiling mount having dimensions such that the lift can be mounted between ceiling joists, however, Enchos does not disclose specific values for the spacing between the ceiling joists and the spacing between the ceiling mounted lift and the ceiling joists. However, one of ordinary skill in the art is expected to routinely experiment with the parameters, especially when the specifics are not disclosed, so as to ascertain the optimum or workable ranges for a particular use. Accordingly, it would have been obvious through routine experimentation and optimization, for one of ordinary skill in the art to dimension the lift such that the lift can be mounted between ceiling joists spaced 16 inches on center and the mount is dimensioned such that there is at least 2 inches spaced between the mount and the ceiling joist.

With respect to claims 18 and 19, Enchos does not disclose specific values for the lift distance and the maximum payloads. However, one of ordinary skill in the art is expected to routinely experiment with the parameters, especially when the specifics are not disclosed, so as to ascertain the optimum or workable ranges for a particular use. Accordingly, it would have been obvious through routine experimentation and optimization, for one of ordinary skill in the art to have a lift distance of at least 50 feet and a maximum payload of at least 250 pounds.

In regards to claims 16, Enchos discloses a ceiling mounted lift, comprising:

a support frame housing 1028 a drive assembly 824 that operates to raise and lower a lifting platen 1034 using a fabric drive roller 1014 and a ceiling panel 1045 (Fig. 34) held to the lift. The examiner takes official notice that it is common knowledge to use a spring loaded or any other suitable adjusting nut to attach the ceiling panel to the lift.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Enchos in view of McCandless (US 1,435,017).

Enchos disclose a bearing at the pivot point, but fails to disclose the details of the bearing. McCandless teaches a bearing arrangement for a pivot joint having a first hardened washer 17 on a side of a bearing 10 and a second hardened washer 17 on an opposing side of the bearing.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the bearing arrangement of Enchos to include a first hardened washer on a side of a bearing and a second hardened washer on an opposing side of the bearing as suggested by McCandless, to provide an inexpensive way to efficiently connect two members (lines 13-24).

Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Enchos in view of Mayer (US 6,305,556).

Enchos discloses a ceiling mounted lift, but fails to disclose a wire management system. Mayer teaches a wire management system comprising a stabilizer 100 and a hole in the stabilizer (at 300, Fig. 3) and a tie wrap 318.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the stabilizer of Enchos to include a hole and a wire wrap as suggested by Mayer, to ensure the cables are secured and fold with the action of the arm (col. 1, lines 28-36).

Claims 7 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Enchos in view of Anderson et al. (US 5,529,274).

Art Unit: 3654

Enchos fails to disclose the drive system controlled by a wireless transceiver. Anderson teaches a wireless remote controlled motor-driven drum 43,49 to raise and lower a sign, having a wireless remote 15 and a transceiver 45,47.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the control drive of Enchos to include a wireless controller as suggested by Anderson, to easily lower the ceiling mount for use or repair (col. 1, lines 37-38).

In regards to claim 8, Enchos as modified by Anderson teaches the lift for use with a home appliance enter (Enchos)

### *Conclusion*

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Evan H. Langdon whose telephone number is (571)272-6948. The examiner can normally be reached on M-F 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kathy Matecki can be reached on (571) 272-6951. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Art Unit: 3654

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.

A handwritten signature in black ink, appearing to read 'E. Langdon', is written over the printed name.
